Role: Sewing Machine Operator
Reporting to: Head of Interiors Aviation
Location: Glasgow

Scottish Leather Group

Scottish Leather Group Limited is the largest manufacturer of leather in the United Kingdom employing over 600 employees globally, across 7 locations including Scotland, China, Germany, Mexico and the USA. We are proud of our heritage as a long-standing Scottish manufacturer, which is steeped in tradition, and we have prospered through the years by continuously looking forward by adopting best in class manufacturing principles.

Partnering with hundreds of prestigious brands in more than 60 countries, our vision is to be the most successful and respected group of leather manufacturing companies in the world and we are passionate about leading sustainable manufacturing practices, continuous innovation and outstanding service.

The Group is long established with combined experience in tanning and finishing leather of over 500 years. Our specialist leathers are produced for a wide range of industries including automotive, aviation, bus and coach, rail, furniture and custom projects. Our customers include Aston Martin, Volvo, Jaguar Land Rover, Ford, Emirates Airlines, Boeing and Philips.

The philosophy of Scottish Leather Group is a desire to establish the highest industry standards for quality, innovation, value, service and care for the environment whilst upholding our Company values; Integrity, Honesty, Fairness and Respect.

Role purpose:

This is an opportunity for the right individual to be involved at the start in creating, from the ground up, a Leather Cut and Sew facility, supplying primarily, the Commercial Aviation and Automotive seat cover market for development and production. Based in Glasgow working in close collaboration with the design and development engineers on new products and R&D projects, the role will be varied and integral to the development of the business.

Key accountabilities:

- Maintain high standards of workmanship.
- Clear and honest feed back to the engineering team
- Be able to work on your own initiative.
- Operating an industrial sewing machine,
- Assembling leather components to produce seat covers
- Working with designers on sewing prototype parts

Experience Desired:

- Experience working with and sewing leather
- Able to set up and use industrial sewing machines.
- Basic knowledge of how to assemble parts using various sewing techniques.
- Work under minimal supervision

Key Competencies Required:

Teamwork

Actively develop and maintain beneficial relationships and contribute towards a common goal

Initiative

Doing it before being asked

Communication

Clear, concise, consistent and relevant for individual situations and understands, manages, and clarifies expectations

Attention to Detail

Your work is complete and accurate

Whole Picture

Making sense of complex situations and systems

Being Organised

Achieve results by prioritising workload, effective time management and showing efficiency with resources available and monitoring progress

Key relationships

Trim and Sew Design Engineers.
